

5G Observatory

5G-Monitor der Europäischen Kommission

Kurt Reichinger

Zielsetzungen des 5G Observatory

- The European 5G Observatory aims to monitor market developments, including trials and other actions taken by industry stakeholders and Member States in the context of 5G rollout in Europe and beyond.
- The Observatory will enable to assess the progress of Europe's 5G Action Plan, and take action to fully implement it.
- IDATE DigiWorld has been selected to carry out the 5G European observatory for the European Commission.

Inhalte des 5G Observatory

- Main 5G market developments including planning and commercial launch of 5G products and services with major impact;
- New developments regarding key 5G products and components as well as technology choices made by key actors including regarding standards and use of spectrum bands;
- 5G pre-commercial trials and partnerships between actors of the 5G value chain;
- National strategies and plans by EU Member States, available national data on 5G deployment including coverage and quality;
- Preparation and execution of spectrum assignments by public authorities as well as 5G public funding for network deployment and R&I.

5G Pioneer Award

5G-Preis der Europäischen Kommission

Kurt Reichinger

5G Pioneer Award

- ... will recognise an exceptional achievement of a front runner in preparing for commercial 5G service launch in Europe.
- ... supports the European Commission strategic objective set out in the “5G Action Plan for Europe” that calls for early commercial launch of 5G services in each European Member State by end of 2020.
- ... is open to all companies, organisations, municipalities or partnerships, which have launched fully-fledged commercial or pre-commercial 5G service initiatives in the EU, (i.e. 5G services opened or about to be available to consumers and/or businesses under commercial terms), at city, regional, or other appropriate geographic level.
- ... will be co-presented by the European Commission and the GSMA at the GLOMO Award Ceremony.
